

Single Row  
Tapered Roller  
Bearing  
32200 Tapered  
Roller  
Bearing-32214J2/Q

**WUXI GUANGQIANG BEARING TRADE CO.,LTD**

Designation	<b>32214J2/Q</b>
Principal dimensions [mm]	
d1	70
D	125
B	33.25
Basic load ratings [kN]	
dyc(Cr)	157
stc(Cor)	208
Pu	24.5
Speed ratings [rpm]	
Speed Ratings	3800
Limiting Speed	5300
Weight(Kg)	1.60
ISO335	
Dimensions (ABMA)	3EC
Dimensions [mm]	
d	70
d1	95
B	31
C	27
r1,2(min)	<b>2</b>
r3,4(min)	1.5
a	28
Abutment and fillet dimensions [mm]	
da(max)	80
db(min)	78
Da(min)	108
Da(max)	115
Db(min)	119
Ca(min)	<b>4</b>
Cb(min)	6
ra(max)	<b>2</b>
rb(max)	1.5
Value	
e	0.43
Y	1.4
Yo	0.8

## **GQZ bearings wholesale high quality 32200 Single Row Tapered Roller Bearing**

The inner diameter of 32203 tapered roller bearings is 17mm, the outer diameter is 40mm, and the width is 16mm. The main features of 32200 series tapered roller bearings are to withstand combined loads, smooth operation, and long service life.

32200 series tapered roller bearings belong to a kind of tapered roller bearings, its inner and outer ring raceway cross-section is conical, mainly to withstand radial load mainly radial and axial combined load. The design of this kind of bearing makes it able to withstand large loads and also certain axial loads, which is characterized by strong load carrying capacity, smooth operation and long service life. Therefore, 32200 series tapered roller bearings are widely used in automobile, engineering machinery, metallurgical equipment, mining machinery and other fields to meet the high requirements for bearing performance and life in various industrial applications. In addition, this series of bearings is also suitable for single row tapered roller bearings, which can withstand radial loads and single direction axial loads, but when withstanding radial loads, an axial force will be generated, so it usually requires another bearing that can withstand axial force in the opposite direction to balance.
